## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, 17, and 31-33, drawn to an isolated nucleic acid encoding *Arthrobacter* hsp70 protein, vaccines comprising a vector of this nucleic acid and a method of preventing disease in fish through the administration of said vaccine.

Group II, claim(s) 9-16, 18-23 and 34, drawn to an isolated *Arthrobacter* hsp70 amino acid sequence, vaccines comprising said recombinant protein and methods of preventing disease through the administration of the protein.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Invention of Group I is not novel. WO 01/29233 A, WO 02/04018, and WO 01/68865 A all teach an isolated nucleic acid sequence encoding an *Arthrobacter* hsp70 protein. Accordingly, the inventions lack unity of invention. Further, the special technical feature of Group I is a nucleic acid which is biologically, structurally and chemically different from a protein which is the special technical feature of Group II.
